

For Offshore Institutions and Corporations (IBCs)

Trading through an international business corporation is the preferred choice for clients wishing manage their affairs with a higher level of discretion. In the offshore world, corporations and, more recently, the LLC (Limited Liability Company), are the norm for business engagements and transactions of any kind.

Most brokers have a difficult time opening accounts for non-U.S. entities. Not TurboTrade. With our strong background of experience with the offshore world, we can guide you to the best option for your specific needs. Most accounts are opened within 48hrs.

TurboTrade provides the fastest executions and electronic trading tools and services to institutional traders, hedge funds and mutual fund managers. Our trading platforms allows buy-side traders to react quickly to market information and movement, as well as manage their portfolio strategy as they monitor risk.

We specialize in providing offshore institutions and IBCs the technology, individualized service and expertise they require to enable them to focus on their trading.

TurboTrade's comprehensive, direct-access trading solution for equities, options, futures and forex that is unparalleled in the industry.

We recommend that offshore corporations (IBCs) have no less than two directors in order to expedite account-opening procedures. If the IBC does not have at least two directors, another form, the "Affidavit of Sole Ownership."

No Need to Change Custodians or Prime Brokers

If you already have a relationship with a trusted custodian, there's no need to change. TurboTrade's DVP (delivery versus payment) account allows you the ability to execute trades through TurboTrade to achieve the best executions available, while still custodizing the assets with your current custodian.

Best of all, it's easy to open a DVP account. Most DVP accounts can be opened by filling out one simple form!

At TurboTrade, we understand the specialized needs of offshore clientele because that's our business--and it's all we do.

TurboTrade's advantages include:

- Equities, Options, Futures and Forex trading
- Multiple Trading Platforms Covering a Range of Experience Levels
- Advanced Risk Management and Customer Tracking Tools
