

Strategy Runner

Strategy Runner is the tool of choice for customers wishing to add more structure and discipline to their trading. Unlike many front-ends that offer only trade execution, Strategy Runner generates trade signals, sets profit and loss targets, and improves the overall trading experience for the serious trader.

Strategy Runner offers two versions:

- Strategy Runner Pro provides full functionality for both manual order placement and automatic strategy execution
- Strategy Runner Lite provides manual order placement functionality only.

Strategy Runner Lite

A professional trading platform with the following:

- A bracket feature providing profit targets and stop losses
- OCO functionality, scale-outs and trailing stops unavailable on most front-ends
- One-click trading from Market Depth
- Real-time charts
- Risk control: daily profit & loss limits and contract limits
- Animated screenshots: [Image 1](#), [Image 2](#)

Strategy Runner Pro

Allows hands-free trading with enhanced features that include:

- Robust, accurate, tick-by-tick execution of multiple strategies
- Execution of trades in multiple accounts
- Real-time transparency of strategy performance using graphical monitoring
- Complete control over execution
- Automate your trading system using the Strategy Runner API and/or our Strategy Development Service
